

An aerial photograph showing a large industrial facility for hemp block production. In the foreground, a tall white wind turbine stands prominently. The facility consists of several large white buildings with blue roofs. One building has the text "CONSTRUIRE EN BLOCS DE CHANVRE" and the ISOHEMP logo. Stacks of grey hemp blocks are visible in the yard. The background features a flat landscape with more wind turbines under a clear sky.

The world leader in hemp
blocks production

5 million blocks/year
will be produced here

The hemp block, an affordable construction solution

Dry product which meets the
high construction standards
